

①

- A ON/OFF button
- B Flashing LED every half minute (Amber color)
- C Battery charge indicator LEDs (Amber color)
- D Wireless charger

When the ON/OFF switch is held for 2 seconds it will power on the portable and you will see an ascending of the LEDs **C** indicating the powering on and in the ON mode. Pressing and holding the ON/OFF switch again for another 2 seconds will power off the device and you will see a descending of the LEDs **C** indicating the powering off and in the OFF mode.

When in the OFF mode you will no longer see the LED flash **B** indicator LED. This means the device is OFF. When in the ON mode you will see the LED flash **B** indicator LED. This means the device is ON.

②

Charge up your wireless charge portable Blushield before use. Use the wireless charge dock to do so. It may take as long as 6 hours or less to charge up depending on the state of charge left in the portable.

Use the USB cable provided to plug into the charging dock (small end type C connector) and then plug the larger USB end into the power brick. Plug the power brick into a wall power outlet and place the portable (LOGO UP) as per picture above.

The lights on the charging dock will shine red when the portable is charging.

③

To see the status of charge on the portable push the ON/OFF button once and hold to see the LED charging lights **C** light up. One LED will be flashing. This indicates the charging level. Once fully charged all the LEDs will no longer flash and all four LEDs will be lit. This indicates that the portable is fully charged. LEDs will not remain lit for the duration of the charge, you may have to push the power button again to see the status. **A**

The Blushield wireless portable will last at least 30 days on a single charge and possibly longer depending on use. The strength of protection of this model is twice that of the other smaller portables. The battery capacity is 500mAh.

④

The Blushield wireless charge portable carries a warranty for a period of 1 year. This covers factory defects or faults. This does not cover misuse, modification or neglect. If a claim is to be made all postage costs are to be covered by the customer and the Blushield Distributor will decide whether to repair or replace product depending upon the fault.

This product is not water proof. There is a built in water indicator to show that the portable has been dropped in water or been through the wash. The warranty does not cover water damage. All electronics when exposed to water will cause corrosion of electronic parts and failure of the electronic circuit.

This wireless charge model does away for the need of a usb charging port therefore it should be more durable. It may be charged up to 500 times before the battery will become weaker.

Expected life expectancy of the wireless charge portable is approximately 5 years if looked after and keep in good working condition.
