## AIR TUBE ANTI-RADIATION HEADSETS

These Air Tube headphones reduce your exposure to mobile phone electromagnetic radiation (EMR) by up to 98%. Traditional ear bud headphones put the speaker inside your ear. This means your brain is exposed at very close range to the speakers magnetic field and any radiation that travels up the headphones wire.

## FEATURES INCLUDE:

- Reducing radiation exposure by up to 98%
- Excellent sound quality
- Answer calls and hangup using the function button - no need to touch your phone
- Much harder to tangle than traditional wired ear bud headphones
- Three different sizes of silicon earbuds (3 pairs) included
- Alligator clothing clip
- Compatible to all major 3.5 mm pin mobile devices
